SEVERITY

Medium

ISSUE TYPE

Functional

SOURCE

Exploratory

FREQUENCY

Every Time

ENVIRONMENT

Samsung Galaxy S10 - Android 12, Wi-Fi

Bug Details

You are viewing the details of a bug in status "PENDING". This indicates the bug has been recommended to the customer one way or another by a Test Team Lead who ensures that bugs are not duplicates, are in scope and contain all necessary information. It does not guarantee the bug to be approved as it's still the customers decision in most case to make the final decision.

As the customer reviews the findings from their tests, they will approve or reject bugs accordingly, however each customer works at their own pace. The review timeframe will vary. There are some customers who consistently review reported bugs as they trickle in. For example, the test cycle may still be active, but the customer is already approving or rejecting bugs as they are being reported. On the other hand there are also customers who wait until the test cycle is complete before reviewing the reported bugs. As a general rule of thumb, please allow 35 days after the test cycle locks before sending a request about why your report has not been reviewed yet. You may request a review of a bug that has not been approved or rejected after 35 days after the test cycle has locked (!) by contacting us via <https://www.utest.com/contact-us>.

Read more about the [bug approval process](#) and our [bug reporting FAQ](#).

COMPONENT	Poland
ACTION PERFORMED	<div>1. Open the mobile app - Sky Showtime</div> <div>2. Set Pin in your profile</div> <div>3. Save Profile</div> <div>4. Click on profile which you set the PIN code</div> <div>5. Enter your PIN code</div>
EXPECTED RESULT	No display of PIN code
ACTUAL RESULT	Display PIN code - when we enter the PIN code it is visible
ADDITIONAL ENVIRONMENT INFO	Displaying the PIN code should not be possible for security reasons. Of course, this is not, for example, a bank account, where it must protect its data from possible theft. However, by setting a PIN, we expect additional security. When displaying such a code, it can be difficult. You can see the problem in my video.
REPRODUCIBILITY	Yes
VERSION / BUILD NUMBER	3.12.12
SCREENSHOT OF APP VERSION ADDED	Yes
